

IS-124 Series LCD Touch-Screen Glass Island Hood

Kobe Range Hoods

Product Description:

Utilizing the type of touch screen technology that is similar to those used in the navigation system of luxury cars, KOBE's Glass Canopy Island Hoods use a LCD touch-screen control panel. The first of its kind to be available in ventilation hoods, the LCD touch-screen control panel allows the user to navigate through the menu by touching the icons on the screen. Available in 36 inch & 42 inch glass canopy, this innovative island range hood features 4 speeds, including KOBE's unique QuietMode(TM), auto gas & smoke sensor and room temperature regulator. There's a choice of 3 LCD background screen colors, date & time, cooking timer and delay fan shut-down. Visit our website, www.koberangehoods.com, for more information or to find the nearest distributor or dealer.

Company Description:

Our KOBE brand range hoods are design by Tosho & Company, Ltd., our parent company in Japan. Tosho & Company, Ltd. has been selling quality products in Japan & globally for almost 30 years.
